

Fine Art and Photography A-Levels

Bridging the Gap Year 11 – Year 12

For both Fine Art and Photography A-Levels – the main activities that you should be doing to prepare yourself for Year 12 study are predominately practical.

Drawing from observation is extremely important for Art students ensuring accuracy, good use of tone and challenge. **This should be a weekly activity.**

Photography students need to take photos. You should be used to following themes in projects in order to create 'bodies of work'. We would like you to (safely!) try and create a body of work entitled 'Covid 19' in which you aim to reflect this strange time we are living through.

Useful Reading:

www.art2day.co.uk - read this regularly to keep up to date with contemporary artists.

A good book for Art and Photography students is: 'The story of Art' by E H Gombrich.
