Beliefs & Values – Year 12

| | Autumn 1 | Spring 1 | Summer 1 | |
|------------------|---|---|---|--|
| Topic Objectives | Buddhism H573/06 In this component, learners can undertake a systematic study of key concepts within the development of Buddhist thought. This component examines the foundations of Buddhism, investigating both the significance and context of the Buddha as a source of wisdom and authority, as well as the importance of the Three Refuges in expressing Buddhist identity and acting as the underlying principles of Buddhist teaching. The key teachings of Buddhism and their interconnections form the basis of the topics Samsara, The Three Marks of Existence, and the Four Noble Truths. Exploration of these will provide students with insight into Buddhist beliefs about ultimate reality, the self, the meaning of life and death. These teachings also form the foundations of Buddhist practice and key moral principles. The practice of meditation is studied in detail, with an emphasis on the personal nature of mediative practice and diversity of methods used by Buddhists. | Philosophy H573/01 This component explores philosophical issues and questions raised by religion and belief. This topic considers ancient philosophical influences and how it provides important foundational knowledge for the study of philosophy of religion. This and the Soul, mind and body enable the exploration of philosophical language and thought through significant concepts and the works of key thinkers. Students will also be introduced to different types of religious experience and will be encouraged to discuss and debate the significance and meaning of such experiences, as well as how they can shape religious belief. Students will consider the problem of evil and suffering. This has been debated for millennia, this issue is still relevant and problematic for many today. | Ethics H573/02 In this component, learners have the opportunity to study key concepts related to religion and ethics. Students will study the four normative ethical theories, providing a range of approaches: deontological and teleological, religious, and non-religious. Students will then apply these ethical theories to two issues of importance: euthanasia and business ethics. This allows students to explore and deepen their understanding of the ethical theories. | |

Beliefs & Values – Year 13

| | Autumn 1 | Spring 1 | Summer 1 | |
|------------------|---|--|---|--|
| Topic (s) | Buddhism | Philosophy | Ethics | |
| | H573/06 | H573/01 | H573/02 | |
| Topic Objectives | Students will explore Buddhist beliefs, values and teachings, their interconnections, how they develop historically and how they are presently discussed. Learners will focus upon the development of Mahayana Buddhism and how it was pivotal in the historical development of Buddhism, and the distinctive ideas and philosophy of these schools, including Madhyamaka. It will stretch and challenge learners, through introducing them to the truly diverse range of ideas and traditions within Buddhism. Students will further develop their understanding of the variety within Buddhist tradition by examining Buddhist practices and ideas in two very different cultural context: the Far East and the West. This will enable them to investigate different interpretations of Buddhist teachings and examine the relationship between religion and society. | Students will critically analyse three contrasting arguments regarding the existence of God. Such arguments are a fundamental element of the philosophy of religion, as well as key to personal beliefs of many individuals. Thought studying the nature of God, students will explore how ideas within philosophy of religion have developed over time and make comparisons between ideas presented in the key work of scholars. The two sections that give focus on religious language give students the opportunity to examine issues such as whether religious teachings should be understood symbolically or analogically, or whether religious language should be regarded cognitively or non-cognitively. | In this component, students have the opportunity to study key concepts related to religion and ethics. Within ethical language: Metaethics, students will explore how ethical language has changed over time and been interpreted by different scholars. Students will develop an awareness of the importance of significant concepts within the study of ethics, they will examine the significant ethical concept of conscience, through the comparison of two key thinkers; Aquinas and Freud. | |

Acquired Knowledge / Skills

- Students will gain knowledge of the development of Buddhism. They will know the significant social and historical developments in Buddhist thought, such as those influenced by ethics, philosophy, and religion. They will know the development of Mahayana Buddhism, Madhyamaka and the prajnaparamita. Students will be able to know the ideas of Nagarjuna.
- Student s will know the relationship of Buddhism and society, including issues such as how Buddhism can adapt when encountering different cultures, religious tolerance, respect and recognition and views of other religions and non-religious world views.

 Students will gain knowledge of Zen and Pureland Buddhism. They will understand Buddhism in the West, in popular culture and Western 'inculturation.
- Students will assess the challenges facing Buddhism from areas such as science, secularisation, migration and multi-cultural societies and changing gender roles. Students will gain knowledge of Engaged Buddhism, Buddhism and social activism, Buddhism and gender and female monasticism.

- Students will gain the knowledge of theological and philosophical developments over time and know how over time this has been influenced by developments in religious beliefs about the nature of God. Students will know about the nature and attributes of God understanding the developments of omnipotence, omniscience, (omni)benevolence, eternity and free will.
- Students will consider religious language: negative, analogical or symbolic. Students will understand religious teachings, and compare the significant ideas presented in the works of key scholars. Students will know the apophatic way, cataphatic way, and symbol.
- Students will know Twentieth century perspectives of religious language.
 Students will know logical positivism, Wittgenstein's language games and falsification symposium.

- Students will gain knowledge of meta-ethical theories and how ethical language in the modern era has changed over time. They will gain knowledge of naturalism, intuitionism, and emotivism. Students will consider the term 'good' and question how humans ethically relate to this.
- Students will consider significant ideas in religious and moral thought, through the comparison of the works of two key scholars from the field of religion and ethics. Students will look at Aquinas' theological approach and Freud's psychological approach. They will compare the areas of guilt, presence, or absence of God within the workings of the conscience and super-ego and the process of moral decision-making.
- Students will know the development of ethical thought overtime and how this has impacted upon religious belief and practices, societal norms, and normative thought. Students will know how to apply this to premarital and extramarital sex and homosexuality. Students will know how to apply ethical theories to make moral decisions in these areas of sexual ethics.
